Response to Amendment

1. This communication is responsive to the amendment filed on July 19, 2005. Claims 1, 11, 18 and 22 have been amended. Claims 1-22 are now pending.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19 and 22 are drawn to Computer Network Managing, classified in class 709, subclass 223.
 - II. Claims 20-21 are drawn to Multiple Network Interconnecting, classified in class 709, subclass 249.

Combination-Subcombination

3. The inventions are distinct, each from the other because of the following reasons:

Inventions group I and group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed (Invention (I) A method of using a router to cache inquiry data

corresponding to a target device in a network having a plurality of client devices, the method comprising: storing inquiry data, receiving a request for the inquiry, reading the inquiry data and providing the inquiry data corresponding to the target device) does not require the particulars of the subcombination (Invention (II)) as claimed because the Invention (I) do not rely upon the specific details (A storage area network comprising: one or more host devices; circuitry coupled between the one or more host devices) of the subcombination for their patentability.

The subcombination has separate utility such as a storage area network for one or more host device including: one or more sequential access devices; circuitry coupled between the one or more host devices and the one or more sequential access devices and coupled to a cache memory.

Conclusion To All Restriction Requirements

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
6. Applicant is required under U.S.C. 121 to elect a single group disclosed as described above for prosecution on the merits because each of the groups requires different search in different class and subclasses.
7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
8. A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS ACTION IS SET TO EXPIRE THIRTY DAYS FROM THE MAILING OF THIS COMMUNICATION. FAILURE TO RESPOND WITHIN THE PERIOD FOR RESPONSE WILL CAUSE THE APPLICATION TO BECOME ABANDONED (35 USC § 133). EXTENSION OF TIME MAY BE OBTAINED UNDER PROVISION OF 37 CFR 1.136(A).
